Do Your Part. Be SepticSmart!

Shield Your Field

Divert rain and surface water away and avoid parking vehicles and planting trees on your drainfield.

Don't Overload the Commode

Don't flush diapers, wipes or other items meant for a trashcan down the toilet.

Think at the Sink

Limit use of your garbage disposal and avoid pouring fats, grease, solids and harsh chemicals down the drain.

Don't Strain Your Drain

Use water efficiently and stagger use of water-based appliances, such as your washing machine or dishwasher.

Well

Protect It and Inspect It

A typical septic system should be serviced every one to three years by a septic service professional.

Pump Your Tank

Ensure your septic tank is pumped at regular intervals as recommended by a professional.

Keep It Clean

If you are on a well, test your drinking water regularly to ensure it remains clean and free of contamination.
